

## **FILA VELOCE \$100**

**WE SAY:** This new model from Fila is lightweight and built low to the ground for a fast, racing-flat feel. The midsole is filled in under the arch, which will give runners a bit more support than you'd expect and provide a better overall ride. The shoe also features a glove-like fit, and RW Shoe Lab tests showed the Veloce to be one of the softest and most responsive shoes in this review. Recommended for runners with normal to high arches looking for a speedy, lightweight shoe for training and racing.

**WEAR-TESTERS SAY:** "The shoe had a snug, comfortable fit, and I really felt the arch support." —Eileen Carr, 49, Allentown

"Overall the shoe fit well, but it needs more cushioning in the forefoot." —Erin Ploskonka, 23, Allentown
